January 7, 2009

Dear Parents,

The Montgomery students in Kindergarten will take the **Stanford 10/Aprenda Achievement Test on Monday, January 12-16, 2009.**

The Stanford 10 is a nationally-standardized, normed instrument adopted by the Houston Independent School District to complement and supplement the criterion-referenced TAKS program and to serve as an ongoing classroom assessment program. This assessment data may be used for promotion/retention decisions, for the Neighborhood G.T. Program placement and for diagnostic classroom use.

We feel confident that our students are prepared for the test and will do well.

Please help your child to prepare for this test by being sure him/her:

- has had adequate rest the night prior to the testing days;
- eats a normal breakfast;
- is on time for the 7:35 a.m. bell;
- comes to school with a positive attitude; and,
- brings two #2 pencils to school.

The test will begin promptly at 8:15 a.m.

There are no accommodations for students who arrive late. **All students must be present.**

Thank you for your assistance in helping us create a positive testing environment for our students.

Sincerely Yours,

Dr. Faye McNeil
