Hoffman's Sloth

By Amy Ballantyne, Katherine Kling,
and Ellen McCloskey

The animal of the month is the Hoffman's sloth. They are extremely slow animals. There are many types of sloths. The Hoffman's sloth is just one.

Diet

The Hoffman's Sloth's diet is wild leaves, twigs and fruit.

Behavior

The Hoffman's Sloth is active only at night. It spends most of its life in trees.

Habitat

The Hoffman's Sloth lives in tropical forests in Central South America. It lives at altitudes of 7,000 feet.

Characteristics

- Grayish brown coat
- Average adult length 2 feet
- Average adult weight 12-15 pounds
- Life span 10-20 years
- Front feet have 2 toes
- Back feet have 3 toes

Fads!

by Rachel Sklar

There are many new fads at West U. There are clothing fads and even watch fads. For girls it's mostly camouflage, jeans, tank tops, striped T-shirts backless tennis shoes, sandals and bubble T-shirts. For boys it is mostly T-shirts, shorts, pants, zip-off pants, sandals and tennis shoes. Continued see Fads p3.

Harry Potter

Harry Potter is all the rave. Evilness, friendship, craziness, witches, and wizards. Mix it all together and what do you get? One wacky potion also known as the Harry Potter book series. That's what! It all starts when Voldemort kills 1-year old Harry's parents. He is delivered to his mean muggle (non-magical) Aunt and Uncle. Ten years later Harry is accepted into the Hogwart's School of Witchcraft and Wizardry. What happens next? Read the book to find out. See the chart to find out what our class thought of Harry Potter.
